PROFILE

Software developer (Advanced Vocational Degree in Multi-Platform Application Development, DAM) with hands-on experience building AI products. Currently contracted by Linaris (a Spanish AI orchestration company) to build a multi-tenant SaaS platform end to end: Python (FastAPI) backends, semantic search (RAG) and 200+ automated tests. Previously built an internal LLM-agent service for automated content analysis during my internship at the same company. Autonomous and methodical, used to shipping under continuous technical review.

EXPERIENCE

Software Developer (Freelance) — Linaris · Remote *Jun 2025 – Present*

- End-to-end development of a multi-tenant AI SaaS platform: two React 19 + TypeScript web apps (Vite, Tailwind CSS), two Python (FastAPI) APIs and a shared core library.
- Document ingestion pipeline and semantic search (RAG) with Gemini embeddings and a Qdrant Cloud vector database; LLM-based generation.
- Multi-tenant persistence and authentication on Supabase (PostgreSQL) using JWT and role-based row-level security policies; catalog, document and user management endpoints.
- 200+ automated tests (pytest) across both backends; iterative delivery with near-daily technical reviews.

AI Developer (Internship) — Linaris · Madrid *Apr 2025 – Jun 2025*

- Built an internal automated content analysis service: data ingestion from third-party APIs, audio and video processing, and LLM agents producing structured reports.
- Designed its evolution to a multi-agent architecture on FastAPI, with database persistence and direct LLM API integration.

Freelance Web Developer — Remote *2025 – 2026*

- Shopify e-commerce for a wellness brand: two custom Liquid themes, CSV catalog import and support on client proposals.
- Catalog automation for an optics distributor: extracted and cropped 94 product images from PDFs with Python (pdfplumber, PIL, Tesseract OCR), cross-referenced with price sheets.
- Web consulting for a local business: online booking system, local SEO and deployment.

Sales & Customer Service — Ocaso Seguros · EHS TV · Pizzería Carlos · Talleres Arancar *2020 – 2024*

- Phone sales, customer service and issue resolution under pressure — the foundation of my communication and client-facing skills.

EDUCATION

Advanced Vocational Degree in Multi-Platform Application Development (DAM) — IES Domenico Scarlatti *2024 – 2026*
· Graduated

High School Diploma, Science Track (Bachillerato) — IES Domenico Scarlatti *2019 – 2021*

TECHNICAL SKILLS

Applied AI: RAG, embeddings, vector databases (Qdrant), hybrid search (BM25 + vector) and reranking, LLM APIs (Anthropic Claude, Gemini), agent design, LLM evaluation (regression testing, hallucination detection), audio and video processing, AI-assisted development

Backend: Python, FastAPI, async/await, Pydantic, REST APIs, multi-tenant architecture, JWT / OAuth / RLS authentication, pytest, PostgreSQL (Supabase), SQLite, MySQL

Frontend: React 19, Next.js, TypeScript, Vite, Tailwind CSS, JavaScript, HTML5/CSS3

Java: Java SE, layered architecture (MVC), DAO pattern, JDBC, Swing, MySQL; Spring Boot and AWS at academic level

DevOps & tools: Docker, Vercel, Git/GitHub (branching, pull requests, code review), CI/CD (GitHub Actions), Shopify (Liquid)

LANGUAGES

Spanish & Catalan: native · English & French: C1 (fluent) · Driving licence B (in progress)

PROJECTS

goldenfc.es: Website and fantasy league for a local football team in Aranjuez (Next.js, Supabase, Vercel, custom domain). Designed and built end to end, from data model to deployment. Installable PWA live in production with 21 active users.

minirag: RAG API with hybrid retrieval (BM25 + vector), RRF fusion and reranking (FastAPI, Qdrant, Docker, GitHub Actions). External providers behind interfaces: runs with no API keys and no database. 89 tests, 96% coverage. github.com/briankm7/minirag
